controller.

## **LISTING OF THE CLAIMS:**

The pending claims are as follows:

1. (Original) A method for executing a locked bus transaction in a multi-node system, comprising:

initiating a locked-bus transaction at a bus agent;
transmitting a locked-bus request to a first node controller; and
deferring the locked-bus transaction at the bus agent by said first node controller.

2. (Original) The method of claim 1 further comprising:transmitting the locked-bus request from the first node controller to a second node

- 3. (Original) The method of claim 2 further comprising: preventing bus transactions on a bus coupled to said second node controller.
- 4. (Original) The method of claim 3 further comprising: performing the locked-bus transaction by the bus agent over the multi-node system.
- 5. (Original) The method of claim 1 further comprising:
  asserting a signal to said bus agent by said first node controller to prevent said bus agent from initiating a bus transaction.

' Serial No.: 09/751,623

6. (Original) The method of claim 5 further comprising: transmitting the locked-bus request from the first node controller to a second node controller.

- 7. (Original) The method of claim 6 further comprising: preventing bus transactions on a bus coupled to said second node controller.
- 8. (Original) The method of claim 7 further comprising: deasserting said signal to said bus agent by said first node controller.
- 9. (Original) The method of claim 8 further comprising: performing the locked-bus transaction by the bus agent over the multi-node system.
  - 10. (Original) A multi-node system comprising:
  - a bus agent to initiate a locked-bus transaction; and
- a first node including a first bus and a first node controller to receive a locked-bus request and defer the locked-bus transaction at the bus agent.
  - 11. (Original)The system of claim 10 further comprising:
- a second node including a second bus and a second node controller to receive the locked-bus request from the first node controller.

Serial No.: 09/751,623

- 12. (Original)The system of claim 11 wherein said second node controller is to prevent bus transactions on said second bus.
- 13. (Original)The system of claim 12 wherein the bus agent is to perform the locked-bus transaction over the multi-node system.
- 14. (Original)The system of claim 10 wherein said first node controller is to assert a signal to said bus agent to prevent said bus agent from initiating a bus transaction.
  - 15. (Original)The system of claim 14 further comprising:

a second node including a second bus and a second node controller to receive the locked-bus request from the first node controller.

- 16. (Original)The system of claim 15 wherein said second node controller is to prevent bus transactions on said second bus.
- 17. (Original)The system of claim 16 wherein said first node controller is to deassert said signal to the bus agent.
- 18. (Original)The system of claim 17 wherein the bus agent is to perform the locked-bus transaction over the multi-node system.

' Serial No.: 09/751,623

19. (Original)A method for executing a locked bus transaction in a multi-node system, comprising:

initiating a locked-bus transaction at a bus agent;

transmitting a locked-bus request to a first node controller;

deferring the locked-bus transaction at the bus agent by said first node controller;

transmitting the locked-bus request from the first node controller to a switching

agent; and

preventing further transactions from said switching agent.

20. (Original)The method of claim 19 further comprising:

performing the locked-bus transaction by the bus agent over the multi-node

system via the switching agent.

21. (Original)A method for executing a locked bus transaction in a multi-node

system, comprising:

initiating a locked-bus transaction at a bus agent for a first I/O node including a

first I/O device;

transmitting a locked-bus request to a first node controller; and

deferring the locked-bus transaction at the bus agent by said first node controller.

22. (Original)The method of claim 21, further comprising:

transmitting the locked-bus request from the first node controller to the first I/O

node.

'Serial No.: 09/751,623

23. (Original)The method of claim 22, further comprising:

preventing transactions at the first I/O node for I/O devices coupled in said first I/O node.

24. (Original)The method of claim 23, further comprising:

performing the locked-bus transaction by the bus agent over the multi-node system to the first I/O device.
